ALL ABOUT

TOOLS

If you really love your bike, you're going to enjoy wrenching on it. Zen and the art of bicycle maintenance. There is something liberating about knowing that you've fine-tuned the performance of your bike to your personal tastes and requirements. BBB knows this. We have offered tools from the very first day we got into this business. And to this day we are ready to assist in your quest of keeping your ride operating as well as the day it was wheeled out of your LBS for the first time. We have divided the BBB tool collection into three categories: on the road to help you with road-side repairs, workshop tools that are stronger and bigger and toolboxes that offer a selection of tools in one handy carrying case. Keep wrenching, keep riding!

MICROFOLD XXL | BTL-42XXL

MICROFOLD

Compact and complete. The MicroFolds pack all the necessary functions in a sleek and minimalistic exterior. The rubber-coated case is ergonomic and protects scratches on your tool and bike frame. the XXL is a true macgyver of functions and has already won two major tests!
